

OHMVR Commission Meeting

October 29, 2015

Prairie City SVRA and

NOHVCC Guided Trail Tours & Workshops
Folsom

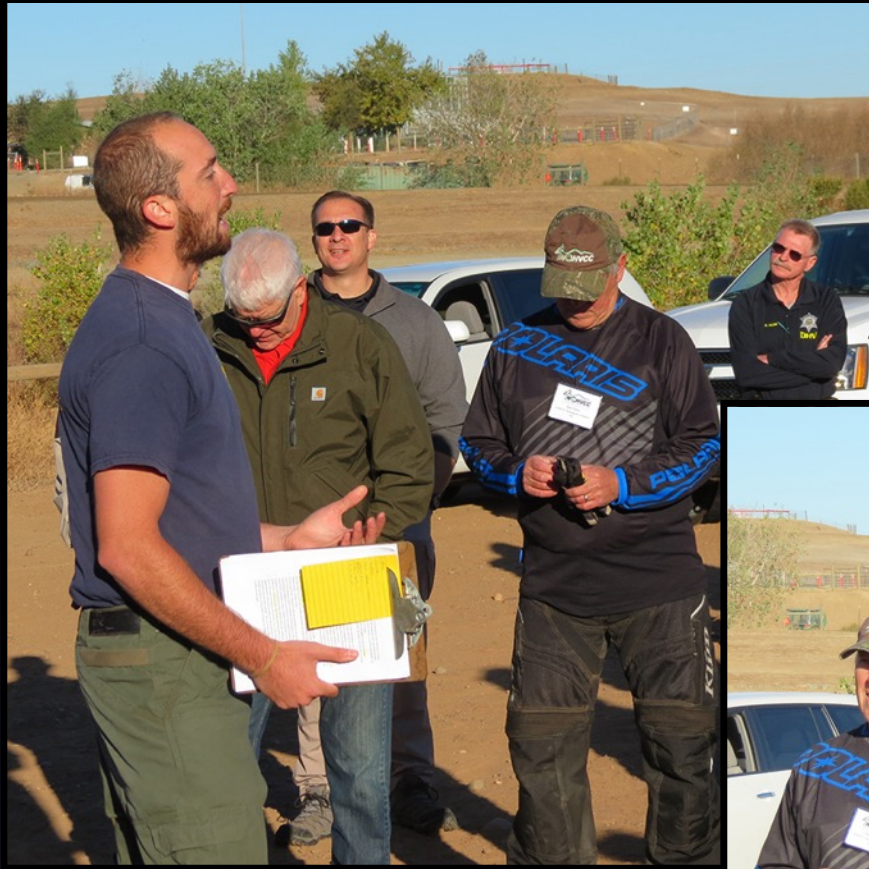

Prairie City SVRA 4x4 Improvement Project

- The 4x4 Improvement Project transformed the 4x4 area of Prairie City into one of the most popular recreational areas in the park.
- The project managed to greatly improve recreational facilities while also prioritizing water quality management.
- Major features of the project included concrete obstacles, a mud pit, a rock-lined drainage and vegetated drainage buffers.

Prairie City SVRA Wet Improvement Project

- The Wet Improvement Project transformed the 100-acre of Prairie City into one of the most popular recreational areas in the park.
- The project managed to greatly improve recreational facilities while also prioritizing water quality management.
- Water features of the project included concrete obstacles, a sand pit, a rock-lined drainage and vegetated drainage buffers.

Prairie City SVRA In-Stream Improvement Project

- The In-Stream Improvement Project transformed the In-Stream area of Prairie City into one of the most popular recreational areas in the park.
- The project managed to greatly improve recreational facilities while also providing water quality management.
- Major features of the project included concrete structures, a sand pit, a backland drainage and regulated drainage baffle.
